DETAILED ACTION

Response to Amendment

The amendment filed 27 February 2007 has amended claims 1-8. In light of these amendments and the Applicant's arguments on pages 13 and 14, the Examiner's rejections of claims 1, 5, and 9 under 35 U.S.C 112 are withdrawn.

Drawings

The drawings were received on 5 January 2007. These drawings are acceptable.

Allowable Subject Matter

Claims 1-14 allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not suggest the common inventive feature contained in independent claims 1, 5, 9, and 10. The prior art does not teach a voltage variable dependent upon torque and a torque variable dependent upon voltage for a propulsion system in a motor vehicle, wherein each variable sets a tolerance band (claims 1 and 5), upper and lower permissible values (claim 9), or permissible variations (claim 10). The closest prior art, represented by US 6,504,327 (Omata) teaches setting voltage and torque limits, wherein the limits for both are based upon detected voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 6,343,252 (Asami) teaches a hybrid vehicle with torque and charge detection.
